

2006

Total Yukon GDP by Industry, 2006	\$1,298,000,000
Growth Rate from 2005 to 2006	3.0%

The Gross Domestic Product of an industry represents the value added by labour and capital in transforming inputs purchased from other industries into output.

2006 Highlights

The Yukon's Gross Domestic Product by Industry rose \$38 million, or 3.0%, in 2006 after a revised increase of 4.1% in 2005. In 2006, the largest dollar value increases were seen in the public administration and the finance & insurance, etc. sectors. Public administration, the largest sector, increased by \$10.6 million, or 3.5%, from \$300.1 million in 2005 to \$310.7 million in 2006. In 2006, the finance & insurance, etc. sector increased by \$9.9 million, or 4.3%, from \$232.2 million in 2005 to \$242.1 million in 2006. There was also an increase in the retail trade sector, increasing from \$80.4 million in 2005 to \$84.3 million in 2006, an increase of \$3.9 million, or 4.9%.

Note: Percentages are based on the sum of industry GDP figures, which does not equal the "Total Industry" figure. See page 8 for further detail.

**Nominal GDP by Selected Industries
1997 to 2004**

This analytical report presents Statistics Canada's latest estimates of Yukon's Real GDP by industry in chained 2002 (inflation-adjusted) dollars for 2001-2006 and Nominal GDP by industry in current (not adjusted for inflation) dollars for 2001-2004. The figures are subject to revision.

Statistics Canada has adopted the chain Fisher volume index method of calculating the inflation-adjusted, or real, gross domestic product (GDP). The reason for the adoption of this method is twofold: it produces the most accurate measure of growth in GDP and its components; and the change brings the Canadian measure in line with the US quarterly Income and Product Accounts which also use the chain Fisher formula to measure real GDP. Use of the chain Fisher index has also been recommended by the United Nations "System of National Accounts 1993," chapter 16.

An important consequence of using chain indexes is that the associated volume measures are not additive. That is, the sum of the chained values for each component of an aggregate does not equal the chained value of the aggregate.

For example, the sum of the components of the Transportation & Warehousing Industry is not equal to the number given for that industry, just as the sum of the industries is not equal to the number given for All Industries.

For more information, visit: <http://www.statcan.ca/english/concepts/chainfisher/methodology.htm>

The estimates contained in this publication are produced by Statistics Canada's Input-Output Division, and are reconciled with the overall provincial/territorial GDP figures produced by Statistics Canada's Income and Expenditure Accounts Division (IEAD). While the general concepts followed in compiling these estimates are consistent with those underlying the IEAD, there still remains conceptual differences between the GDP at market prices and GDP at basic prices. For more information, refer to: <http://www.statcan.ca/english/nea-ecen/gloss/ima.htm>

All of the GDP estimates in this publication are measured in basic prices.

Definition of the Public Administration
Note on the definition of economic units (companies or establishments)
Industry: Economic units are classified together in the same industry if they are engaged in the same or a similar kind of economic activity. The industrial grouping does not depend upon whether the activity is carried on by a government agency or by a commonly understood as 'government' is of the activity and assigned to its related industrial group. Because so much of the activity is assigned to its related industrial group and reallocated distribution, the 'Public Administration' in the industrial classification in these tables provides a limited view of government activity. It includes only those establishments of government which clearly do not belong to any other branch of economic activity, but which are essentially concerned with general administration, and defence.

public sector, and
